

Case Study: Growth in M.Tech Program Admissions in Food Engineering and Technology at SLIET, Longowal, Distt. Sangrur, Punjab

GROWTH IN ADMISSION IN M.TECH PROG OVER THE YEARS

Introduction:

The Department of Food Engineering and Technology (FET) at Sant Longowal Institute of Engineering and Technology (SLIET), Longowal, has experienced a remarkable growth in admissions to its M.Tech program in Food Engineering and Technology. This growth can be attributed to the department's commitment to research excellence, evident in its prolific publication record in reputed journals and the successful grant of patents.

Research Excellence and Reputation:

The FET Department at SLIET has carved a place for itself in the field of food engineering research. With an emphasis on cutting-edge research projects, the faculty members have consistently produced high-quality work that addresses contemporary challenges in the food industry. The department's dedication to innovative research solutions has established its reputation as a leading contributor to advancements in food engineering and technology.

Publications in Reputed Journals:

The FET Department's faculty members have made substantial contributions to the field through their publications in esteemed journals. These publications span a wide spectrum of topics, including food processing, preservation techniques, quality assurance, and sustainable

practices. The department's presence in respected journals not only highlights its expertise but also serves as a beacon for prospective students seeking an academic environment that values research and intellectual growth.

Patents as a Measure of Innovation:

A key indicator of the department's research excellence is its success in obtaining patents for innovative solutions. The FET Department's faculty members have displayed a strong commitment to translating their research into practical applications. The grant of patents demonstrates the department's capability to address real-world challenges and contribute to the development of the food industry.

Conclusion:

The Department of Food Engineering and Technology at SLIET, Longowal, has witnessed a significant increase in admissions to its M.Tech program due to its unwavering commitment to research excellence. The department's remarkable publication record in respected journals and its success in obtaining patents showcase its dedication to advancing knowledge and addressing real-world challenges in the food industry. As the department continues to drive innovation and research in food engineering, it not only strengthens its own reputation but also contributes to the growth and development of the broader field.
